Sales Contract

We have agreed the transfer of the above cat at the following conditions.

Price: 1.300,00 EUROS

Payment / Charge

Payment of the full amount must be done before the cat is transferred to the buyer or at the latest on delivery or pickup. 1/2-part should be paid on accept of this contract through bank transference into the following account:

LABORAL KUTXA, Basque Country (Spain, European Union)

SWIFT (BIC): CLPEES2MXXX

IBAN: ES74 3035 [REDACTED]

Account No. [REDACTED]

Name of the account's owner: Sabin J. Bizkarralegorra Bravo

Home address of the account's owner: same as in the front page.

In case the buyer, for whichever reason, finally retreats from acquiring the cat, the breeder will keep half of the full payment as compensation.

Delivery

If the delivery of the cat would take place at the buyer's residence, all costs regarding the transportation and handling of the transfer should be paid by the buyer. If the breeder would deliver the cat, the travelling expenses for the breeder are also paid by the buyer, with a previous budget agreement with the buyer. The buyer can pick up the cat at the breeders address at no charge. In this last case the buyer will check with the breeders for a proper date for the picking up the cat.

Use

The cat is sold for companionship. Therefore is not intended for breeding and thus is provided already neutered (spayed/castrated). The buyer is informed about the congenital defects and disease in the line known to the breeder at the time of purchase. For that reason breeder provides a copy of the genetic test results of both parents of the kitten of known diseases of Abyssinian cats.

The BREEDER undertakes to guarantee:

Health

The breeder warrants replacing the cat with a cat of comparable quality in case the cat dies because of a genetic defect before the age of 2 years, if and only if this defect is shown in a certified autopsy. The breeder also warrants replacing the cat with a cat of comparable quality in case a qualified laboratory and a veterinarian certificate the existence of any of the genetic and health defects whose tests are available and listed in Appendix I and Appendix II of "FIFe Breeding & Registration Rules" at the date of the acceptance of this contract. For the cat replacement to take place in this case, these tests have to be done before the cat is 2 years old.

Sales Contract

Breeding ability

Seller warrants that the cat is neutered (spayed/castrated).

The following conditions will lead to all health guarantees in this contract not to enter into force if:

- a. The cat is not vaccinated annually against Feline Leukemia (FeLV) and "cat flu/Influenza" (Rhinothracheitis Herpes Virus, Calicivirus and Panleukopenia -RCP).
- b. The cat moves freely outdoors.
- c. The cat is exposed to physical harm or neglect.

Diseases

The cat has been vaccinated against:

- 1) Cat flu or influenza(RCP) which includes the following vaccines: Rhinothracheitis (FVR, sometimes also found as FHV), Calicivirus(FCV) and Panleukopenia (FPV). First shot and 1st booster.
- 2) Chlamydia (which causes Feline Pneumonitis). First Vaccine and 1st booster.
- 3) Leukemia(FeLV). First vaccines after being tested negative, and 1st booster.
- 4) Rabies. Only first vaccine.

Both parents of the cat has been tested and found free from Leukemia, Feline Immunodeficiency Virus (FIV or cat"HIV"), Patellar Luxation (PL), Retinal Degeneration II (PRA), Pyruvate Kinase Deficiency (PK), Polycystic Kidney Disease (PKD1) and Mucopolysaccharidosis (MPS).

The parents of the cat were tested negative to FIV and FeLV, and the kitten afterwards was vaccinated against viruses mentioned on numbers 1,2 and 3 above twice: Initial vaccine and the first booster (3 weeks apart). Rabies vaccine was only given once (no sooner booster is needed other than the annual). From now on, only the annual boosters will need to be provided by the buyer, at least for RCP and FeLV. Ch (Chlamydia) will be required if the cat will be used for breeding. And Rabies only for countries not freed of rabies and for all cats expected to travel on airplanes.

The BUYER undertakes to guarantee:

Resale

The breeder must be informed on resale or new placement of the cat.

Health

The buyer must keep the breeder informed about the cat's welfare. If serious illness occurs the breeder must be contacted and advised if the cat dies.

The buyer undertakes to look after the cat properly and provide the necessary veterinary treatment, and to vaccinate the cat annually.

The buyer is forbidden to surgical de-clawing the cat for furniture protection proposes. The cat must not be isolated or living in a cage.

Hereditary defects

The buyer must report any subsequent defects as the cat would develop or display them.

Sales Contract

General

By signing this agreement both, the seller and the buyer, state they understand and agree to its terms. Both parties have received a copy of the agreement. In conclusion of this contract pedigrees, passport, genetic test certificates and the required veterinarian certificates (such as umbilical hernia and neutering documentation etc.) will be handed when the cat will be passed to the buyer.

In case of any dispute between buyer and the breeder on the interpretation of this contract, may it be brought before ASFE's Disciplinary Committee (FIFe Spain).
